Morssinkhof Rymoplast

Lichtenvoorde / Zeewolde (Arnhem Area), Netherlands

Re: Application for Process Engineer Position

Dear Hiring Manager,

I am writing to apply for the **Process Engineer** position at **Morssinkhof Rymoplast**. As a European leader in high-grade recycled raw materials, your company sets the standard for the circular economy. I am eager to bring my extensive experience in extrusion and recycling technology to your team.

Recycling & Compounding Specialist

My 6 years at **MAAG Group** were dedicated to optimizing polymer processing systems, with a strong focus on recycling applications. I have successfully commissioned pelletizing lines for rPET and rHDPE, increasing throughput by outstanding while ensuring the high quality required for food-grade applications. I understand the critical parameters for processing post-consumer waste and how to achieve stable, high-quality output.

Operational Excellence

At **Autoneum**, I have honed my skills in **Lean Six Sigma** and process automation. I am experienced in identifying inefficiencies and implementing data-driven solutions to reduce costs and energy consumption. I am confident I can apply these skills to further optimize Morssinkhof Rymoplast's large-scale recycling operations.

Relocation to the Netherlands

I am actively relocating to the **Netherlands** and am committed to building my future there.

As a fluent English speaker (and native German), I am ready to collaborate effectively with your international team.

I would welcome the opportunity to discuss how my technical expertise can contribute to Morssinkhof Rymoplast's continued leadership in the recycling industry.

Sincerely,

Jonas Glawion
