**To:**

Hiring Manager

Orange Plastics BV

Eindhoven, Netherlands

**Re: Application for Process Engineer Position**

Dear Hiring Manager,

I am writing to apply for the **Process Engineer** position at **Orange Plastics BV**. Your diverse portfolio in injection molding and assembly for sectors ranging from medical to industrial is impressive. I am eager to bring my broad experience in plastics processing and project management to your team in Eindhoven.

**Versatility & Project Management**

During my 6 years at **MAAG Group**, I managed complex projects from application trials to final commissioning across Europe and Asia. I am accustomed to adapting to different customer requirements and materials, a skill that fits well with Orange Plastics' project-based approach. I have extensive experience in troubleshooting and optimizing production lines to meet strict deadlines and quality targets.

**Process Optimization**

At **Autoneum**, I utilize **Lean Six Sigma** and data analysis to drive continuous improvement. I have successfully reduced cycle times and improved material efficiency in high-volume production. I am excited to apply these optimization strategies to your injection molding and assembly processes.

**Relocation to Eindhoven**

I am actively relocating to the **Eindhoven area** and am committed to building my future

there. As a fluent English speaker (and native German), I am ready to collaborate effectively with your international team and clients.

I look forward to the possibility of discussing how my skills can support Orange Plastics' growth and diverse projects.

Sincerely,

**Jonas Glawion**
