Re: Application for Process Engineer Position

Dear Hiring Manager,

I am writing to apply for the **Process Engineer** position at **Alligator Plastics** in Eindhoven. I have long admired Alligator Plastics' reputation for "The Art of Molding" and your ability to solve complex injection molding challenges. With my background in process optimization and plastics technology, I am eager to contribute to your innovative team.

Technical Problem Solving

Throughout my career, I have focused on mastering complex polymer processes. At **MAAG Group**, I commissioned pelletizing systems globally, often troubleshooting intricate process deviations on-site to ensure optimal product quality. This experience has honed my ability to analyze process parameters deeply and implement effective solutions—skills I am ready to apply to your injection molding projects.

Optimization & Innovation

Currently, at **Autoneum**, I work on the industrialization of automotive components, where precision and efficiency are paramount. I have successfully used **Lean Six Sigma** to reduce waste and improve cycle times. Additionally, my self-driven initiative to learn **Python** and apply AI for quality prediction demonstrates my commitment to staying at the forefront of technological advancements in manufacturing.

Relocation to Eindhoven

I am actively planning my relocation to the **Eindhoven area**. I am drawn to the region's status as a technology hub and its vibrant community. As a German native with fluent English, I am confident I will integrate smoothly into your team and the Dutch working culture.

I would welcome the opportunity to discuss how my technical skills and passion for plastics engineering can support Alligator Plastics in delivering top-tier solutions to your clients.

Sincerely,

Jonas Glawion
