Quadpack

L'Hospitalet de Llobregat (Barcelona), Spain

Re: Application for Process Engineer Position

Dear Hiring Manager,

I am writing to apply for the **Process Engineer** position at **Quadpack**. Your commitment to sustainable packaging innovation and premium design is inspiring. I am eager to bring my expertise in plastics processing and operational excellence to your team in Barcelona.

Quality & Sustainability

My background at **MAAG Group** involved optimizing processing systems for recycled polymers (PCR), which aligns with Quadpack's "Positive-Impact Packaging" strategy. I understand the technical challenges of working with sustainable materials while maintaining the high aesthetic standards required for cosmetic packaging. I have a strong track record of troubleshooting process deviations to ensure premium quality.

Process Optimization & Data

At **Autoneum**, I have successfully implemented **Lean Six Sigma** methodologies to improve efficiency and reduce waste. I also leverage **Python** for data analysis, enabling me to identify trends and optimize production cycles proactively. I am excited to apply these digital tools to enhance Quadpack's manufacturing capabilities.

International Mindset

I am relocating to the **Barcelona area** and am fully committed to building my career there. As a native German speaker fluent in English and learning Spanish (A2), I thrive in international environments and look forward to collaborating with your global team.

I would welcome the opportunity to discuss how my technical skills can contribute to Quadpack's mission of helping beauty brands perform.

Sincerely,

Jonas Glawion
