Re: Application for Process Engineer (Automotive) Position

Dear Hiring Team,

I am writing to apply for the **Process Engineer** position at **BCNC GROUP** in Valencia. With my current role in the automotive supply chain at Autoneum and a strong background in process engineering, I am excited about the opportunity to contribute to your engineering projects for major automotive OEMs.

Automotive & Engineering Expertise

At **Autoneum**, I specialize in the industrialization of polyurethane foam components for automotive acoustic and thermal insulation. I have led the launch of new product lines for E-mobility vehicles, ensuring zero customer complaints and reducing cycle times by substantial. My experience with **PPAP**, **FMEA**, and **IATF 16949** standards ensures I can seamlessly integrate into your high-quality engineering workflows.

Process Optimization & Automation

My technical background includes deep expertise in **PLC programming (Siemens, Schneider)** and process automation. I have successfully implemented Lean Six Sigma methodologies to drive cost reductions and improve first-pass yields. Furthermore, I have developed AI-driven quality prediction models using Python, demonstrating my ability to leverage modern technology for process improvement—a skill I am eager to apply to BCNC's innovative projects.

International Mobility

I am actively relocating to **Valencia** and am fully committed to establishing my career in this vibrant region. I am accustomed to working in international environments and am currently improving my Spanish (A2) to complement my native German and fluent English.

I am confident that my blend of automotive experience, technical process knowledge, and "hands-on" mentality makes me a strong candidate for BCNC GROUP. I look forward to the opportunity to discuss my application further.

Sincerely,

Jonas Glawion
