Hiring Manager
Van der Heijden Nederland Packaging
Eersel (Eindhoven), Netherlands

Re: Application for Process Engineer Position

Dear Hiring Manager,

I am writing to apply for the **Process Engineer** position at **Van der Heijden Nederland Packaging**. Your expertise in developing custom packaging solutions, particularly for high-value sectors like medical devices, is highly impressive. I am eager to apply my background in plastics engineering and process optimization to your production operations.

Packaging & Process Knowledge

My experience at **MAAG Group** gave me a strong foundation in polymer processing, which is essential for creating high-quality packaging materials. I understand the importance of material properties and process stability in ensuring the protection and integrity of packaged goods. I have a proven track record of optimizing production parameters to increase throughput and reduce waste.

Efficiency & Innovation

At **Autoneum**, I have honed my skills in **Lean Six Sigma** and continuous improvement. I am experienced in analyzing production flows and implementing changes that reduce costs and improve efficiency. I am also proficient in data analysis, which allows me to make informed decisions to optimize packaging processes.

Relocation to Eindhoven

I am actively relocating to the **Eindhoven region** and am committed to establishing my career there. I am fluent in English and German, and I look forward to integrating into your team and contributing to your innovative packaging solutions.

I would welcome the opportunity to discuss how my technical skills can support Van der Heijden's mission to deliver perfect packaging.

Sincerely,

Jonas Glawion
