**To:**

Hiring Manager  
Green Plastic Factory (Save Plastics)  
Arnhem, Netherlands

## Re: Application for Process Engineer Position

Dear Hiring Manager,

I am writing to apply for the **Process Engineer** position at **Green Plastic Factory**. Your innovative approach to recycling difficult-to-process plastics and turning them into valuable products is truly inspiring. I am passionate about the circular economy and eager to apply my technical skills to your mission in Arnhem.

### Recycling Technology Expertise

During my time at **MAAG Group**, I gained extensive experience in optimizing extrusion and filtration systems for recycled polymers. I understand the challenges of processing mixed and contaminated waste streams, and I have successfully implemented solutions to improve throughput and melt quality. My background fits perfectly with your goal of processing "low-grade" plastics into high-quality products.

### Process Innovation

At **Autoneum**, I have demonstrated my ability to innovate and optimize processes using data-driven methods. I am proficient in **Python** and data analysis, which can be invaluable for monitoring and improving your novel recycling processes. I am excited to bring this technical rigor to your pioneering facility.

### Relocation to Arnhem

I am actively relocating to the **Arnhem area** and am fully committed to building my future there. As a fluent English speaker (and native German), I am ready to collaborate effectively with your team.

I would be honored to contribute to the Green Plastic Factory's vision of a waste-free world. Thank you for considering my application.

Sincerely,

Jonas Glawion
