Plastic Industrie "Utrecht" (PIU) B.V.
Maarssen (Utrecht), Netherlands

Re: Application for Process Engineer Position

Dear Hiring Manager,

I am writing to apply for the **Process Engineer** position at **PIU**. Your long-standing expertise in custom injection molding and mold development is highly respected. I am eager to bring my technical skills in plastics processing and optimization to your facility in Maarssen.

Injection Molding & Tooling

My experience at **MAAG Group** and **Autoneum** has given me a comprehensive understanding of polymer processing, from raw material handling to final part production. I am familiar with the intricacies of mold design and process parameter optimization, ensuring high-quality parts with minimal cycle times. I have a hands-on approach to troubleshooting and am comfortable working directly on the shop floor to resolve technical issues.

Efficiency & Sustainability

I am particularly impressed by PIU's commitment to sustainability, such as reusing excess materials. At Autoneum, I have led projects to improve material efficiency and reduce waste using **Lean Six Sigma** tools. I am confident I can contribute to your sustainability goals while maintaining operational excellence.

Relocation to Utrecht

I am actively relocating to the **Utrecht area** and am committed to building my future there. As a fluent English speaker (and native German), I am ready to integrate into your team and contribute to PIU's continued success.

I look forward to the possibility of discussing how my experience can support PIU's diverse injection molding projects.

Sincerely,

Jonas Glawion
