Barcelona / Valencia, Spain

## Re: Application for Technical Service / Process Engineer Position

Dear Hiring Manager,

I am writing to express my strong interest in joining **Coscollola**, the premier partner for **KraussMaffei** in Spain. With my deep background in extrusion and compounding technology from MAAG Group, combined with my hands-on experience in commissioning and troubleshooting, I am uniquely positioned to support your technical service and engineering teams.

### Extrusion & Compounding Expertise

During my 6 years at **MAAG Group**, I worked extensively with high-performance extrusion and pelletizing systems. I am intimately familiar with the machinery and processes that KraussMaffei is famous for. I have commissioned over 12 systems globally, often working directly with customers to optimize their processes and resolve complex technical issues. This experience ensures I can effectively support Coscollola's clients in maximizing the value of their KraussMaffei equipment.

### Technical Problem Solving

I thrive on solving technical challenges. Whether it's optimizing screw configurations, troubleshooting melt pressure issues, or integrating new automation solutions, I approach every problem with a structured, analytical mindset. My skills in **PLC programming** and data analysis (Python) further enhance my ability to diagnose and fix modern, connected machinery.

### International & Language Skills

I am actively relocating to the **Spanish coast (Barcelona/Valencia)**. I am a native German speaker with fluent Business English, which allows me to communicate effectively with KraussMaffei's headquarters in Munich as well as international clients. I am also dedicated to improving my Spanish (currently A2) to fully integrate into the local market.

I would be honored to bring my passion for German engineering excellence to Coscollola and support your mission in Spain. Thank you for considering my application.

Sincerely,

Jonas Glawion
